

# Project Chatbot

What do we want to accomplish? Can we calculate a value? **30 second goal**

1. Sharepoint table consolidation
  - A. global table
  - B. resources from intranet page
2. Determine either bot service or integrate both
3. Building basic bot & connectors to table data

4. Automate flows between bot and apps
5. Version Control and documentation
6. API connections to external site(s)
7. Publish/test bot in Teams
8. create report/PowerBI dashboard
