## Iberoamerican Conference on Advanced Oxidation Technologies

October, 7 – 11<sup>th</sup>, 2024  
OCEANIA CONVENTION CENTER - Florianópolis/SC

### AUDIENCE

- Academics from Universities
- Researchers from Innovation Centers
- Professionals from Industry
- International Associations of processes related to Advanced Oxidation Technologies

## GOALS

CIPOA 2024 is set to unite professionals from around the world, as they explore the principles and practical applications of Advanced Oxidation Technologies.

With a focus on the chemical and food sectors, as well as environmental sustainability, renewable energy, sanitation, and smart cities, the conference aims to promote a sustainable, carbon-neutral circular economy.

Attendees can expect to engage in insightful discussions and presentations on cutting-edge technologies that will shape the future of these industries.

## HIGHLIGHTS

- Additional topics of interest include techno-economic analysis of industrial and commercial processes for treating soil, water, wastewater, and air.

- Innovative applications of AOTs for synthesizing high-added-value products and green hydrogen will be discussed.

## TOPICS

- Remediation of water, soil and air
- Ozone, hydrogen peroxide, and UV/solar light applications
- Fenton and photo-Fenton process
- Heterogeneous Photocatalysis
- Sonolysis
- Plasma
- Electrochemical processes
- Integration of AOTs with biological and physico-chemical processes
- Renewable combustibles
- Green hydrogen and water splitting
- Food preservation
- Sanitization
- AOTs for application in hospitals and health field
- Modelling and simulation of reactors applied to AOTs

## OPPORTUNITIES FOR PARTICIPANTS

- Novel and proficuous connections senior scientists, researchers, academics, and industry experts, and other professionals interested in sustainability and environment protection.
- Valuable insights into the latest advancements and applications of Advanced Oxidation Technologies
- Outstanding plenaries, keynotes, oral and poster presentations, the conference promises to offer an enriching and impactful experience for all who attend.
- Cutting-edge technologies applied to the environmental remediation.
- Innovative technologies to produce green hydrogen and renewable combustibles.

## FLORIANOPOLIS - SC - BRAZIL

**Florianópolis, fondly referred to as *Floripa*, has a unique charm that sparks the imagination of all who visit, earning it the nickname "Island of Magic".**

Florianópolis, the charming capital of Santa Catarina, is home to 42 stunning beaches that effortlessly blend cultural, historical, and artistic heritage with breathtaking natural beauty. Whether you're a resident or a traveler, the city has plenty of attractions to offer, making it a destination that is sure to capture your attention.

Floripa offer from seafood-based traditional cuisine to more sophisticated gastronomy, resulting in the city being recognized as the first Creative City of Gastronomy in Brazil by UNESCO.

Floripa offers the perfect destination for all seasons with its blend of nature, sports, beaches, culture, entertainment, and gastronomy. Its allure lies in the city's rich history, vibrant culture, and stunning natural scenery that combine to create an unforgettable experience for any traveler.
