

### **ITP Details**

ITP Reviewer	
ITP Creation Date	2023-07-21
ITP Review Date	
Next scheduled ITP Review Year	

# **Equipment Selection**

# **Equipment Identification**

Equipment Tag Number	568797
Equipment Regulatory Number	0568797
Equipment Serial Number	5656
Equipment CRN	A223.4.5.3.2.8.0
Description	BULLET
Manufacturer	TORONTO IRON WORKS
Build Year	1968

# **Equipment Data Reports**

Data Report	
Certificate of Inspection	

## **Equipment Images**

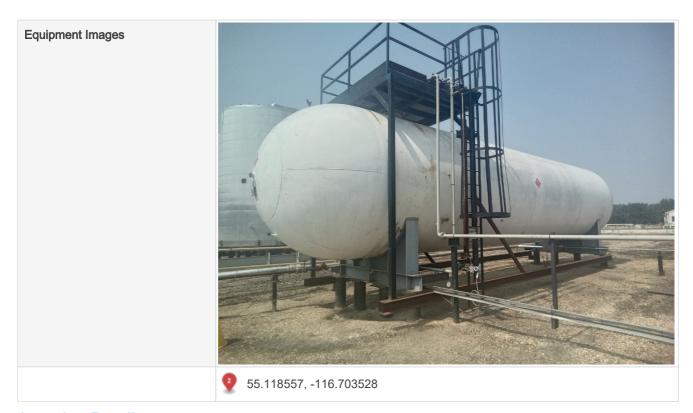

**Equipment Nameplate Images** 

Q

55.118557, -116.703528

### **Location Details:**

Location Bottailo.	
District Name	NORTHERN - AB
Field Name	SNIPE LAKE
Surface Location	07-04-071-18W5
UWI	
Package Number	

# **Location Images**

55.118557, -116.703528

**Location Images** 

<b>9</b> 5	5.118557, -116.703528
------------	-----------------------

**Operational Details:** 

Equipment Type	Vessel
Operating Status	In Service

#### **Shell Process**

Shell Process	Sweet
Fluid	Emulsion, Gas, Water
Comments	

#### **Tube Process**

Tube Process	N/A
14001100000	14// (

### **Coil A Process**

Coil A Process	N/A
----------------	-----

### **Coil B Process**

Coil B Process	N/A
----------------	-----

### **Coil C Process**

Coil C Process	N/A
----------------	-----

### **EQUIPMENT OVERVIEW**

Numbers of years in service
-----------------------------

### **Damage Mechanism**

Describe expected damage mechanisms

# **Previous Repairs and Alterations:**

Previous Repairs and Alterations:

### **Anticipated Repairs and Alterations:**

Anticipated Repairs and Alterations:

## Scheduled Repairs and Alterations / Decommissioning Plan

Scheduled Repairs and Alterations / Decommissioning Plan

### Remaining Life Assessment:

1/2 life	Note - Inspection should not exceed $\frac{1}{2}$ RL, unless $\frac{1}{2}$ RL is less than 2; then the inspection interval can be equal to the Remaining Life
Remaining life as per latest UT Survey (Years)	

1 - Attach latest UT Survey documents	
2 - Attach latest UT Survey documents	
3 - Attach latest UT Survey documents	

## **Equipment History**

Historical details Date	
Detail equipment history for inspections, repairs, NDE, etc.)	

## **Mitigation Activities:**

Activities or systems in place to prevent corrosion or failure)	Operating Procedures, UT Survey Plan
Mitigation Details:	

### **INSPECTION PLANNING**

Type of Inspection (all that apply)

VE (Visual External), UT Corrosion Survey

## **Equipment Preparation:**

Preparation Detail	detail cleaning, access, and general inspection preparation requirements)
An External Inspection will require the following:	External inspections to be performed at recommended intervals to check the condition of the external surfaces of the equipment, insulation systems, painting and coating systems, supports, and associated structure; and to check for leakage, hot spots, vibration, the allowance for expansion and the general alignment of the vessel on its supports. Additionally, the over pressure protection system is inspected to ensure PSV set pressure is at or below the MAWP of the vessel/equipment it is protecting, is aligned in a vertical plane, has correct code stamping and has been serviced within required service intervals.
UT Survey will require the following:	UT survey to be scanned continuously on vessel CML's, in a representative manner, on vessel components such as heads, shell and nozzles. Associated representative sampling of inlet/outlet piping (4-8 CML's) also to be conducted and incorporated into vessel UT survey. Areas of focus on piping would be dead-legs, low points, drains and downstream piping of orifices and process control valves. ISO drawing report and permanent marking of CML for repeatability of future survey also required.
Other Inspection Types	
An Internal Inspection will require the following:	
Other Inspection will require the following:	
Other Inspection(2) will require the following:	
Other Inspection(3) will require the following:	

## **Generated Recommendations and Cautions:**
