Service Centres

Waterflood Service Centres provide professional, cost effective solutions to your machining and mechanical repair needs.

Waterflood is committed to:

- An understanding of our customer's needs
- Efficient, professional service
- Cost effective solutions to our customers requirements
- Ongoing employee product and services training
- Internal quality control from start to finish of every job, big or small
- A safe and healthy work environment

About the company

Waterflood Service and Sales Ltd. was founded in 1970 and is a privately owned Canadian company located in Western Canada. The family that originally started the company over 29 years ago is still involved in the day-to-day operations. Our

company has evolved into a highly technical and diverse service and supply company. Waterflood has sales, engineering services, machining and mechanical service centres throughout Western Canada.

Quality Control

Waterflood has established and maintains an in-house quality control system which compliments the requirements of CWB and our registered provincial quality control manual.

Safety

Waterflood believes safety and production are synonymous. Waterflood provides ongoing safety training to all employees, providing them with the required knowledge to perform their work in the safest possible manner. Our in-house safety program continually monitors and updates all safety aspects, from the beginning employee to upper management.

Engineering Services

The Engineering group provides technical support for Waterflood Service Centres and packaging department. Our engineers and technicians are knowledgeable in the latest and existing technology to provide our customers with comprehensive service.

Fabrication & Packaging

Waterflood's fabrication shop is able to package oilfield equipment efficiently in a controlled all service environment.

waterflood
